To Our Patients:

Your physician has ordered a sinus CT scan, temporal bone CT scan or a lateral neck x-ray to be scheduled at your convenience in our Winter Park office. However, you have the right to obtain radiology services at the facility of your choice.

Our physicians own the CT scanner located in our Winter Park office. Our **MiniCAT™** has several imaging methods, but a typical scan will only take 40 seconds or less. You sit comfortably upright in a chair while an overhead arm makes a single rotation around your head.

Additionally, **MiniCAT™** scans have a significantly lower radiation dose than sinus and ear scans taken on full-body scanners.

If you would prefer not to have your scan done in our office with our low dose scanner, you may choose from one of the facilities listed on the back of this sheet.

Please contact us a week after your testing has been completed so we can discuss the results with you.

Thank you for allowing us to participate in your care.
